

The Cattaraugus County Health Department will be hosting a series of COVID-19 vaccination clinics throughout Cattaraugus County.

A choice between either the Pfizer or Janssen (Johnson & Johnson) vaccine will be offered to attendees at upcoming clinics.

Pfizer vaccine requires the administration of a second dose within 21 days of the initial dose. The Pfizer vaccine is the only vaccine that has emergency use authorization for individuals 12 years of age and older. A parental/legal guardian consent will be obtained at the time of vaccination.

Janssen (Johnson & Johnson) requires a single dose administration. Individuals 18 years of age and older are eligible to receive the Janssen (Johnson & Johnson) vaccine.

Appointments can be made through the Cattaraugus County website by visiting:

<https://www.cattco.org/covid-vacc-info>
