EMS CASE STUDIES

with

Dr. Walters & Dr. Faulk

The review will focus on recent cases our crews have encountered with teaching points and lessons learned that we feel all providers, basic and advanced, can benefit from.

Cases will focus on decision making from BLS through ALS care and will also review some AirTraq intubation videos and tips. The lecture will be an interactive Kahoot format allowing for all providers to participate and test their clinical decision making throughout.

OCTOBER 26, 2023

6:30PM – 8:00PM
