\*\*\*\*For Immediate Release\*\*\*\*

April 8, 2020

Cattaraugus County Health Department (CCHD) was notified of two additional confirmed cases of COVID-19 residents within Cattaraugus County.

The eleventh case is a female resident who lives in the southeastern part of the county with no significant travel history, was seen at an Urgent Care for post nasal drip and headaches, and diagnosed with sinusitis. She later developed fever, cough, and shortness of breath, and on April 6<sup>th</sup> she was tested for COVID-19. The result of the test on April 7<sup>th</sup> indicated that she was positive for COVID-19.

The twelfth case is a male resident who lives in the northeastern part of the county, a healthcare worker who was a close contact with a known positive COVID-19 person. He developed post nasal drip, dry cough, and fatigue. He was tested for COVID-19 on April 6<sup>th</sup> and his test result on April 7<sup>th</sup> confirmed that he was positive for COVID-19.

The patients are resting at home, and now under quarantine with their families. They will be assessed for any medical support that we can provide and we will monitor their symptoms closely.

The department has begun a thorough contact tracing investigation for those individuals that they have been in contact with and the places that they visited.

We continue to ask our residents to bunker down, and avoid any non-essential travel, especially to areas where there is community wide spread of COVID-19 otherwise, you place your family and other Cattaraugus County residents at risk. If travel is necessary, please wear a homemade cloth face mask while in public and maintain social distancing, at least 6 feet away from other people.

We would like to reiterate that if any resident experience fever, cough, shortness of breath or whole body aches they should contact their health care provider (avoid going directly to an Urgent Care facility, or the Emergency Room before calling).

Finally, wash your hands often with soap and water for at least 20 seconds. This is especially important after using the bathroom, coughing, sneezing or blowing your nose.

If soap and water is not available, use an alcohol-based hand sanitizer that contains a minimum of 60% alcohol.

Avoid touching your eyes, nose and mouth, especially with unwashed hands.

Disinfect commonly touched surfaces with a cleaner that is approved by the EPA against COVID-19.

Please stay home if you are sick (at least 24 hours after fever ends.)

Questions of concerns, please contact the CCHD at 716-373-8050, or visit us at Cattco.org.
