Administrative Officer

****For Immediate Release****

July 30, 2020

Cattaraugus County Health Department was notified of its one hundredth and twenty fifth confirmed case of COVID-19. The reporting laboratory was Catholic Health System, Sisters of Charity Hospital, Buffalo, NY. The department's active positive COVID-19 caseload is now ten as there are one hundred and eleven residents who have recovered from COVID-19.

The latest case is a female resident who resides in the northwest corner of the county who has no significant travel history. She has been hospitalized for several weeks and her previous tests for COVID-19 on July 10th and July 22nd were negative for the virus. She was retested for COVID-19 on July 29th as part of a transfer requirement to a rehabilitation facility and her test results indicated that she was positive for the virus.

The department has begun a thorough contact tracing investigation for those individuals that she has been in contact with during her hospitalization.

We would like to reiterate that if any resident experience fever, cough, shortness of breath or whole body aches they should contact their health care provider (avoid going directly to an Urgent Care facility, or the Emergency Room before calling).

In addition, wash your hands often with soap and water for at least 20 seconds. This is especially important after using the bathroom, coughing, sneezing or blowing your nose.

If soap and water is not available, use an alcohol-based hand sanitizer that contains a minimum of 60% alcohol.

Avoid touching your eyes, nose and mouth, especially with unwashed hands.

Disinfect commonly touched surfaces with a cleaner that is approved by the EPA against COVID-19.

Finally, in an effort to determine the prevalence of COVID-19 in our community, any resident interested in getting tested, can register for a test at www.cattco.org/covid-19-test or call 716-938-9119 or 716-938-2265.
