Administrative Officer

****For Immediate Release****

August 1, 2020

Cattaraugus County Health Department was notified of its one hundredth and twenty seventh confirmed case of COVID-19. The reporting laboratory was, Catholic Health System-Sisters of Charity Hospital, Buffalo, NY. The department's active positive COVID-19 caseload is now twelve as there are one hundred and eleven residents who have recovered from COVID-19.

The latest case is a female resident who resides in the northwest corner of the county who reports no significant travel history, or any direct contact with a positive COVID-19 person. She has been asymptomatic (no fever, no cough, no body aches, etc.) for the most part, but recently hospitalized for a surgical procedure. She was tested for COVID-19 on July 31st as a requirement of the procedure, and her test results on August 1st indicated that she was positive for the virus.

The department has begun a thorough contact tracing investigation for those individuals that she has been in contact with and the places that she has visited.

We would like to reiterate that if any resident experience fever, cough, shortness of breath or whole body aches they should contact their health care provider (avoid going directly to an Urgent Care facility, or the Emergency Room before calling).

In addition, wash your hands often with soap and water for at least 20 seconds. This is especially important after using the bathroom, coughing, sneezing or blowing your nose.

If soap and water is not available, use an alcohol-based hand sanitizer that contains a minimum of 60% alcohol.

Avoid touching your eyes, nose and mouth, especially with unwashed hands.

Disinfect commonly touched surfaces with a cleaner that is approved by the EPA against COVID-19.

Finally, in an effort to determine the prevalence of COVID-19 in our community, any resident interested in getting tested, can register for a test at www.cattco.org/covid-19-test or call 716-938-9119 or 716-938-2265.
