The six hundred and first confirmed case is a male resident who resides in the southeast quadrant of the county, who denies any significant travel history. He reports being in direct contact with a positive COVID-19 person but also reports being asymptomatic (no fever, no cough, no body aches etc.). He was given a rapid test for COVID-19 on November 13<sup>th</sup> and his test results indicated that he was positive for the virus.

The department has begun a thorough contact tracing investigation for those individuals that they have been in contact with and the places that they have visited.

We would like to reiterate that if any resident experience fever, cough, shortness of breath or whole body aches they should contact their health care provider (avoid going directly to an Urgent Care facility, or the Emergency Room before calling).

In addition, wash your hands often with soap and water for at least 20 seconds. This is especially important after using the bathroom, coughing, sneezing or blowing your nose.

If soap and water is not available, use an alcohol-based hand sanitizer that contains a minimum of 60% alcohol.

Avoid touching your eyes, nose and mouth, especially with unwashed hands.

Disinfect commonly touched surfaces with a cleaner that is approved by the EPA against COVID-19.

Finally, in an effort to determine the prevalence of COVID-19 in our community, any resident interested in getting tested, can register for a test at [www.cattco.org/covid-19-test](http://www.cattco.org/covid-19-test) or call 716-938-9119 or 716-938-2265.
